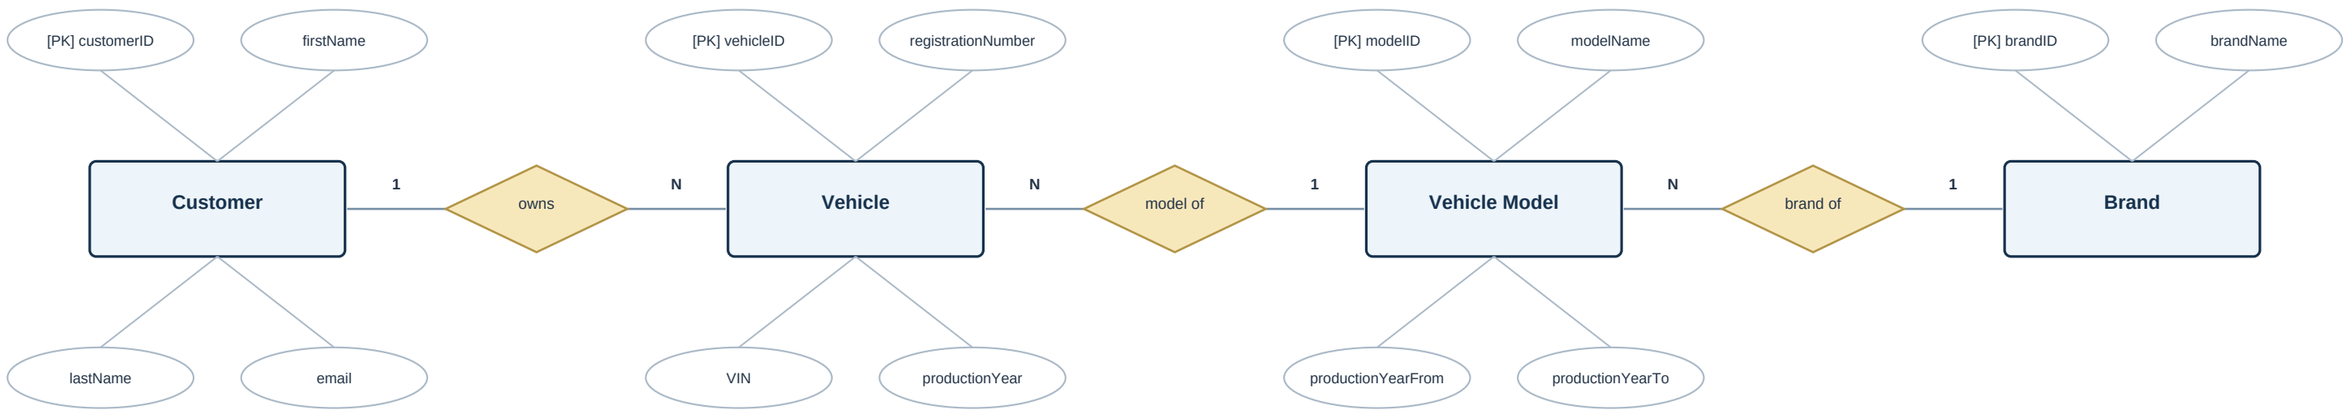
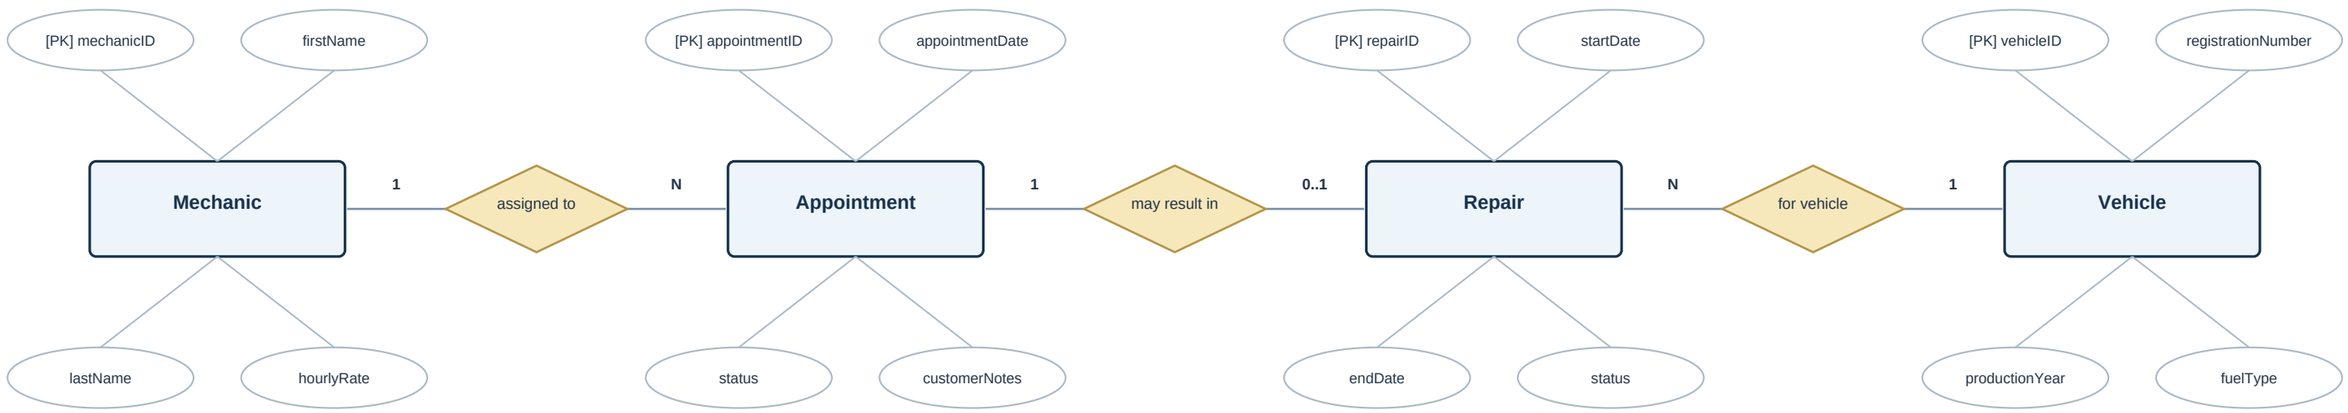
# Car Service Management Platform

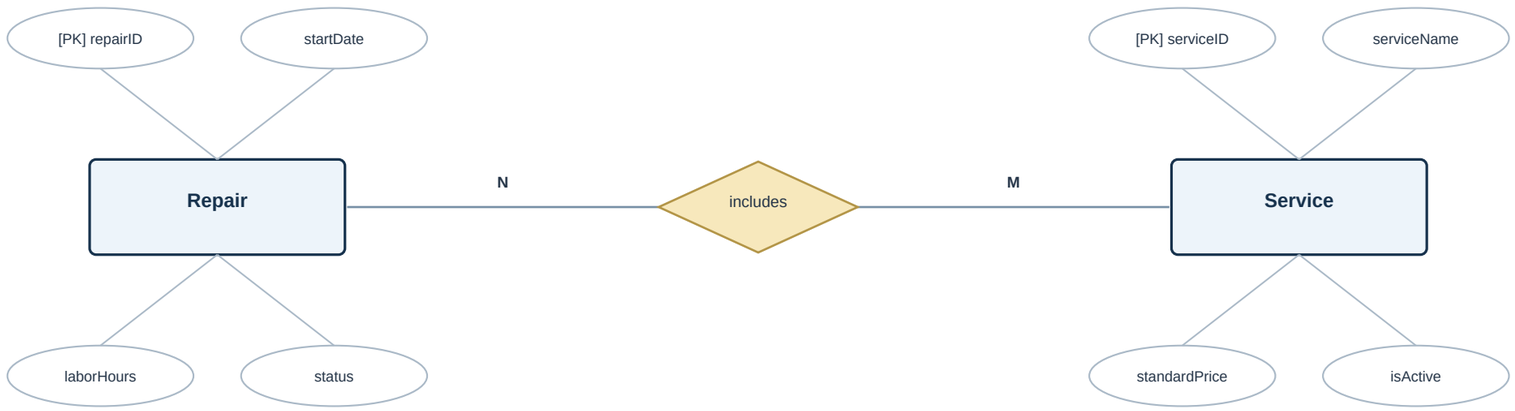
Chen notation | 1. Customer, vehicle and model hierarchy

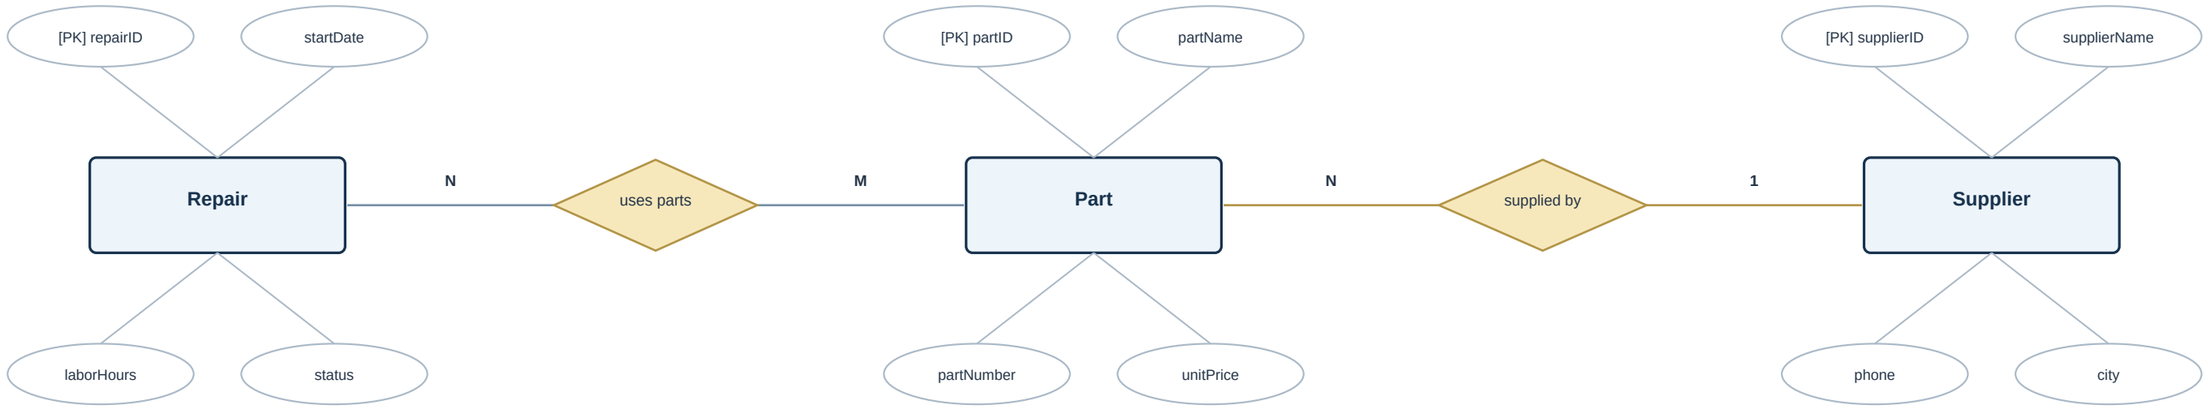


Conceptual entities and representative attributes. The associative implementation tables are omitted from the Chen model.

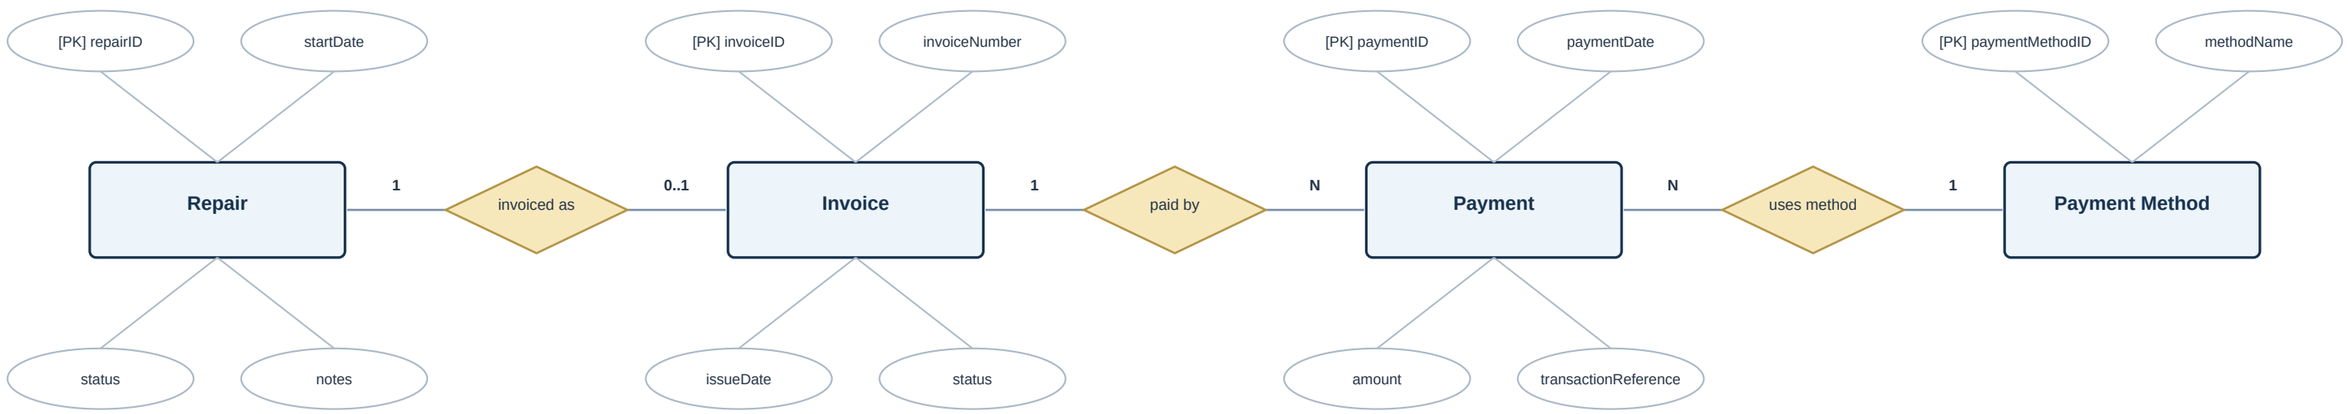


Appointment.mechanicID and Repair.mechanicID assign work to mechanics; each repair concerns one vehicle.





Repair-Service and Repair-Part are many-to-many relationships implemented by RepairService and RepairPart in the relational model.



The invoice references a repair. Multiple payments may be recorded for an invoice; each payment has one method.
